SCAM ALERT

Never give anyone remote access to your computer for any reason.

If you receive a phone call from anyone claiming your computer has a virus or issue that needs to be fixed, never allow them to fix your computer remotely or agree to any service or fees.

This is a well-known scam, and you should hang up on the person immediately. Always check with the police, Council on Aging, or family members if you receive these calls and never give the caller any personal or financial information.

Also, if you encounter any pop-up screens stating your computer has a virus, never click on it or call any phone number listed, as it is also a well-known scam.
