

A Better Option:

Live-In Home Care Is The Better Option!

We are NOT an assisted living facility. You don't need to sell your loved one's home. You keep your cherished home and all of the safety, security, and comfort it offers. We provide the caregiving and professional support.

We are an affordable and cost-effective provider of live-in home care services. We perform thorough vetting of all caregivers. Our caregivers have at least 2+ years of experience, in-depth state and national background checks, multiple interviews, a 2-day orientation, and ongoing in-service training. Our caregivers are FCP Live-In employees, covered by workers' comp, professional liability, and unemployment, and are insured and bonded for even more peace of mind.

Our live-in caregivers provide 1-on-1 personal care, homemaking, companionship, and assistance for each client's unique needs. Our caregivers are there to help with your loved one's daily routine, like walking to the bathroom, medication reminders, and cooking a meal. Caregivers communicate with our office daily and call for help if an emergency occurs. If there's a change in your loved one's condition, we notify family members and other healthcare providers and update the care plan as needed.

**We are NOT an
assisted living facility.**

**We are an affordable and
cost-effective, live-in home
caregiver provider.**

**In-depth vetting of all of
our insured & bonded caregivers.**

1-On-1 personal care.

Our Cost:

Paying For A Live-In Caregiver

No one likes to think about growing older or the possibility of needing long-term care. But according to the U.S. Department of Health and Human Services, there's a 70% chance that individuals turning 65 will need long-term care at some point.

FCP Live-In will work with you and your family to make Live-In Home Care the most affordable option. We also accept most long-term care insurance.

We are an affordable, cost-effective alternative to assisted living care. Our rates are often less than those of an assisted living facility. Plus, having one-on-one interaction between the client and caregiver is mentally beneficial and socially engaging. This type of care makes it easier for our caregiver to catch and report the little changes in your loved one that an assisted living facility staff member or part-time home care aide might miss.

Our Caregivers:

Many Say They Are Angels And Should Have Halos

We only hire the best caregivers with 2+ years of experience. We run in-depth state and national background checks on all applicants, and we further evaluate applicants and conduct thorough interviews. Applicants must pass our skills assessments and attend a 2-day orientation to assess their capabilities and demeanor. These are only a few of the essential steps we take to ensure quality care.

We believe in a holistic approach to senior care, with every caregiver selected to meet each client's unique physical, mental, and emotional needs. Our "Multi-Step Matching System" begins with our care coordinator coming to the home for a thorough understanding of your loved one's physical, mental, and psychological needs, which includes their sleeping habits, favorite foods, TV shows, hobbies, interests, and beliefs.

The field supervisor and/or care coordinator will regularly review the live-in caregiver's client relationship and performance to ensure we have found the ideal match.

Our Care:

Commitment to Quality Caring

Our commitment to our clients, their families, and our caregivers continues after the placement process. Once we've found the ideal match for your loved one, we'll reach out to you, your loved one, or your family member with follow-ups and spot-checks to ensure everything is going well and address any concerns.

You can also expect:

- A professional communication channel with medical providers, home health agencies, nursing facilities, visiting nurses and/or hospice providers
- Pop-in home visits from field supervisors to ensure quality standards are always being met
- A team that is always communicating with care staff, family and supervisors to ensure care plans are updated promptly to one's ever-changing needs
- A 24/7 professional support system
